Cut to perfection.

Our power cords are perfectly customized to fit your appliances.

Prysmian Group

Linking the Future
Linking the future

As the worldwide leader in the cable industry, Prysmian Group believes in the effective, efficient and sustainable supply of energy and information as a primary driver in the development of communities.

With this in mind, we provide major global organisations in many industries with best-in-class cable solutions, based on state-of-the-art technology. Through three renowned commercial brands – Prysmian, Draka and General Cable – based in almost 50 countries, we’re constantly close to our customers, enabling them to further develop the world’s energy and telecoms infrastructures, and achieve sustainable, profitable growth.

In our energy business, we design, produce, distribute and install cables and systems for the transmission and distribution of power at low, medium and high voltage.

In telecoms, the Group is a leading manufacturer of all types of copper and fibre cables, systems and accessories – covering voice, video and data transmission.

Drawing on over 130 years’ experience and continuously investing in R&D, we apply excellence, understanding and integrity to everything we do, meeting and exceeding the precise needs of our customers across all continents, at the same time shaping the evolution of our industry.
Our power cords are perfectly customized to fit your appliances.

Let’s cut to the chase, no matter if it’s a washing machine, power tool or industrial appliance, our power cords will be the perfect fit. With the highest quality performance, longer service life than comparable products on the market and the ability to tailor the cords to your specific requirements, you’ll never find the grass greener on the other side. Finally, to convince you that our offer truly is an ideal match to yours, all power cords and cables are KEMA KEUR and HAR certified.

Introduction

For more than a decade we have produced power cords under the brand of Eurelectric. Since the beginning we’ve sourced top-quality materials from trusted vendors to create power cords for use in industrial, commercial and home applications. And to be able to satisfy all our clients’ needs, we immediately focused on areas such as product development, improvement of the manufacturing processes and customization of products. As a result, our reputation as a world leading manufacturer within the energy and telecommunication cable industries has extended to our power cords under the brand of Prysmian Group as well.

Application

Our power cords have unique performance skills. You can drag them, bend them, pull them and roll them. And you’ll still have outstanding cords with no flaws and ready to set your device in motion.

At Prysmian Group we offer a wide range of products, including power cords with PVC flex cables, harmonized rubber cables and other customer tailored solutions. Our portfolio is completed with single wires specially designed for OEM applications.

We make thorough and recurring test on all our cables to make sure they are safe for domestic appliances as well as industrial applications. That’s why we can stand behind our products with complete confidence.
From the deepest oceans and mines to the farthest satellites orbiting Earth in Space, you’ll find products made by us. In Eastern Europe, in the beautiful Romanian city of Slatina, you’ll find one of Europe’s largest power cable plants. Here our skilled colleagues are manufacturing tons of state-of-the-art cables every year.

Prysmian Romania is a proud part of the world’s largest global actor in the cable manufacturing business – Prysmian Group. But, no matter how large we are, we live and expand thanks to you, our local customers and business partners. We know what you need and can make the cables meet the quality demands that you ask for because we appreciate the importance of understanding local preconditions and your special needs. That’s why we thought it was crucial to extend our range of products to power cords as well and have the production based in Europe. This way we can deliver the cables where and when you need them, lowering transport distances, saving money and protecting the environment. It is a win-win, for all of us.
A responsible approach.

Being the largest cable manufacturer in the world we understand and embrace our responsibility towards both people and the planet we are living on. That’s why all Prysmian Group cables are certified according to important directives and regulations.

**RoHS**

A directive against the use of six different hazardous materials: lead, mercury, cadmium, chromium, PPBs and PBDEs.

**REACH**

A regulation requiring all companies manufacturing or importing chemical substances into EU to communicate these substances throughout the supply chain.
HAR Certification.

All our cables are licensed according to HAR. The HAR Certification is the best possible assurance regarding the quality and compliance of the certified products. To pass through the eye of the needle, a number of product samples are tested and must be approved. And, to maintain the validity of the licence, a stringent programme of tests is carried out on a yearly basis.

Certification
All our power cords are KEMA-KEUR certified.

Dimensional characteristics

Measurements in mm.
Plug 1668

Cordset with straight plug for heavy duty purpose.
Safety class II.
16 A/250 V.

Standard
NEN 1020:1987 + A2:2004

Certification
All our power cords are KEMA-KEUR certified.

Dimensional characteristics

Measurements in mm.
Plug 1664

Straight plug allowed for insulated apparatus.
Safety class II.
16 A/250 V Bipolar.

Standard
NEN 1020:1987 + A2:2004

Certification
All our power cords are KEMA-KEUR certified.

Dimensional characteristics

Measurments in mm.
Plug 1683

Flat two-pole plug.
Safety class II.
2.5 A/250 V Bipolar.

Certification
All our power cords are KEMA-KEUR certified.

Dimensional characteristics

Measurements in mm.
Connector 2254

Connector two-pole plug.
Safety class II.
2.5 A/250 V Bipolar.

Certification
All our power cords are KEMA-KEUR certified.

Dimensional characteristics

Measurements in mm.
Tailored to your requirements.

All our power cords and cables are available in a tremendous variety of configurations, giving you plenty of options to configure your own products.

1. Power cord specification

- **Power cord**: Part number + amperage rating
- **Plug insert**: Plug insert type construction – solid pin, plastic filled hollow pin, hollow pin
- **Cable**: Type-colour-length sq size and N° Conductor
- **Strain relief**: Part number position, pull-test (based on customer specifications)
- **Female end**: Specification for slitting and termination (table 2)

2. Female end terminating

- Cables 2 conductors
  - Stripping
  - Barrel termination
  - Autoband without insulating crimp
- Cables 3 conductors
  - Barrel termination with insulation support
- Cables 3 unequal conductors
  - Crimp terminal
  - Ring terminal
  - Spade terminal

3. Packing options

How to package your products is only a question about what you prefer. We have the ability to adapt and customise the packaging to your specific needs.

ISO 9001:2015
Quality Management Systems

OHSAS 18001:2007
Assessment Specification for Occupational Health & Safety Management Systems
COMMITTED TO QUALITY

Production adapted to customer values and needs.

"Manufacturing is the soul of our company and plants are our heart. We were born to produce. And our world-leading reputation is the result of a truly customer-centric approach based on reliability.”
Andrea Pirondini, COO, Prysmian Group

At our plants in Slatina, Romania, we provide customers and communities worldwide with energy and telecom cable solutions based on state-of-the-art technology, consistent excellence in execution and in-depth understanding of the needs of an evolving market.

As we are in control of our manufacturing process, we are able to perform advanced tests to make sure that all cables leaving our plants maintain the highest quality and comply to all relevant standards – may it concern safety, durability, performance or sustainability.
